Reported attacks and deaths from cholera, small-pox, plague, and typhus in districts in India during the week ending the 16th September, 1950—*contd.*

Explanation of the symbols used:—C = Cases: D = Deaths.

Reported attacks and deaths from cholera, smallpox, plague and typhus in districts in India during the week ending the 16th September, 1950—concl.

**Explanation of Symbols used : C=Cases ; D=Deaths.**

NEW DELHI 3 (INDIA) ; }  
The 9th October, 1950. }

S. P. JAIN,

for Registrar General, India.

# **NATIONAL SAVINGS CERTIFICATES**

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

## **TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT**

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 16th September, 1950

† Figures not available.

Explanation of symbols used :—B.—Births ; B.R.—Birth rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D.D.—Dysentery and Diarrhoea ; R.D.—Respiratory Diseases ; M.D.—Maternal deaths ; D.R.—Death rate ; I.D.—Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for the week ending the 16th September 1950 relate to 167 towns with an estimated population of 19,537 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 72% of the total number of towns representing 69% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,488 and 7,693 representing birth and death rates of 41.6 and 20.5 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 140 towns with an estimated population of 16,411 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 70% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 13,869 and 6,772

representing birth and death rates of 43.9 and 21.5 per thousand of population respectively. The table at the end gives the position by States.

Mayuram in Madras was the only town which had a high death rate of 69.3 per thousand of population and this high death rate does not appear to have been due to any one of the specified causes.

(B) States (Part B).—The data here relate to 27 towns with an estimated population of 3,126 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 84% of the total number of towns representing 83% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,819 and 921 representing birth and death rates of 26.9 and 15.3 per thousand of population respectively.

No town recorded a high death rate of 50 per thousand of population.
